

Next Generation Security Operation Center for NCHC

Director General Dr. Ce-Kuen Shieh

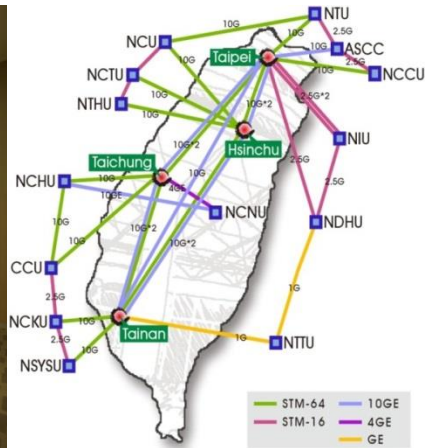

National Center for High-performance Computing, Hsinchu, Taiwan
Dept. of Electrical Engineering, National Cheng Kung University, Tainan,
Taiwan

Abstracts:

In this talk, a brief introduction to NCHC (National Center for High-performance Computing) will be presented first. Then, we will introduce NCHC Security Operation Center from different perspectives, including design, architecture, development and deployment. Next, the technologies used by NCHC SOC will be described. They are large-scale honeypot/honeynet, intelligence dashboard, TWAMN Sandbox and Big data Visualization. Finally, we will give a short summary on the NCHC SOC.
